Dear Ms. Pasciuto:

On behalf of Brestyan's Gymnastics in Burlington, MA, I would like to thank you and the Paul J. Pasciuto Foundation for donating an automatic external defibrillator to the gymnasium. Brestyan's Gymnasium is a world-class athletic institution focused on teaching and training gymnasts, from small children to Olympians. At any given time, there are up to 50 gymnasts in the building along with coaches, parents, and staff. Given the proven benefits of AED's, we felt that an AED was necessary for the gym. Thanks to a grant from you and your foundation, we now have a Zoll AED. We sincerely hope that this equipment will never need to be used, but believe the gym should have an AED just in case. It is an important piece of safety equipment for everyone who walks through the door.

Again, thanks to you and the Paul J. Pasciuto Foundation for the generous donation.

Sincerely,

Jeffrey T. Kuvin, MD
